What is H5P?

H5P is a free, open-source framework for creating rich interactive content: videos, presentations, quizzes and games that play in any web browser.

Create

Richer HTML5 content in the publishing platforms you already use

Share

Content seamlessly across any H5P-capable site

Reuse and modify

Content in your browser at any time

THE CORE IDEA

All you need is a web browser and a website with an H5P plugin.

No coding. No extra software. Content works on computers, phones and tablets alike.

Content types for every kind of activity

Interactive Video

Add questions and hotspots to a video

Course Presentation

Slides with built-in activities

Branching Scenario

Choose-your-own-path learning

Question Set

Mixed quizzes with scoring

Drag and Drop

Sort and match items on an image

Flashcards

Quick recall practice with images

Image Hotspots

Explore a picture point by point

Timeline

Events in order, with media

Where H5P runs

Free plugins

Install H5P on your own site and create content right there.

WordPress | Moodle | Drupal

H5P.com (paid service)

Hosted authoring that connects to your LMS through LTI.

Canvas | Brightspace | Blackboard | Moodle

Plus: any platform that supports embedded content (iframes) can display H5P.

Why use H5P?

Free and open

MIT-licensed, with free demos, tutorials and documentation

Mobile friendly

The same experience on computers, phones and tablets

Portable

Export and import .h5p files to move or reuse content

No coding needed

Authors build everything in a browser-based editor

Get started with H5P

1

Explore

Try the live examples on h5p.org to see what each content type does.

2

Choose a setup

Add the plugin to WordPress, Moodle or Drupal, or use H5P.com with your LMS.

3

Create and share

Build your first activity, then embed, export or reuse it.
